HAJI ABUBAKER SIDIQ M

Python FullStack Development

Chennai, INDIA | hajiabubakersidiq2002@gmail.com | +91 6379539528 | Portfolio | Linkedin | Github

PROFILE OBJECTIVE

Highly motivated and detail-oriented Python Full Stack Developer with expertise in both front-end and back-end technologies. Proficient in Python, Django, JavaScript, HTML, and SQL. Completed a 1-year internship at RR It Solutions, where I contributed to building and deploying web applications, collaborated with cross-functional teams, and gained hands-on experience in developing scalable and efficient software solutions.

INTERNSHIP

Completed 1-year Internship as a "Full Stack Developer" from June to the Present at RR It Solutions (Velachery).

Roles and Responsibilities :

Developed and integrated web applications with responsive design and functionality. Worked on both front-end and back-end development to deliver comprehensive solutions. Collaborated with senior developers to understand project requirements and improve architecture

TECHNICAL SKILLS

Languages: Python (OOP, Functions, Error Handling, File Handling), Javascript (ES6+, Asynchronous, Event Handling, DOM), HTML5, CSS (Bootstrap)

Databases : MySQL (DDL, DML, TCL)
Version Control : Git , GitHub

Projects

Food Order App using HTML, CSS, Javascript, Python , Django   Github

A Django-based food order app allows users to browse menus and place orders online. Features include user authentication and cart management. Users can track their orders and enjoy a seamless food delivery experience. The app streamlines online ordering for foodies. Easy ordering, payment, and delivery tracking are key benefits.

Travel Blog Website using HTML, CSS, Javascript, React |Live here   Github

Discover new destinations through engaging travel blogs on our React website. Share your own travel stories and photos to inspire fellow travelers. Enjoy seamless navigation and dynamic content sharing. Explore and get inspired by diverse travel experiences.

Weather App using HTML, CSS, Javascript |Live here   Github

The Weather App is a responsive web application providing real-time weather data for over 100,000 global cities. Built with HTML, CSS, and JavaScript, it offers a seamless user experience with smooth animations and interactive design.
